# **APT Notes Documentation**

***Release 0.1***

**Kiran Bandla**

January 01, 2017

**1 Contents**

**3**

APT Notes is a collection of various public documents, whitepapers and articles about APT campaigns. All the information is based on publicly available data.

The .. github: <https://github.com/kbandla/APTnotes> repository contains the links, and an archived copy of the link. The documentation here is a secondary effort to better organize the data, and catalog various attacks and groups.
